

Guardian® SunGuard®
Solar Plus

GLASS THAT COMES WITH MANY PLUSSES

The best performing monolithic glass that
turns your ideas into reality

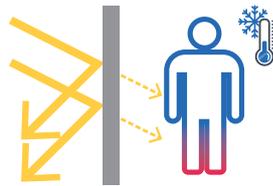

Guardian® SunGuard® Solar Plus

Guardian® SunGuard® Solar Plus Glass Series outperforms other conventional solar control monolithic glasses in its category. Its best-in-class solar protection and thermal control let you design various facades you envision. Guardian® SunGuard® Solar Plus Glass Series is a truly exemplary choice for your projects.

Conventional Solar Control Monolithic Glass

Limited solar protection leads to limited savings on energy bills

Guardian® SunGuard® Solar Plus Glass Series Monolithic Glass

Higher solar protection plus low emissivity leads to saving more on energy bills

ALWAYS BE PLUS ON

Energy Efficiency

Best U-value in monolithic category
Enhanced occupant comfort
Shorter payback period

- Higher solar protection along with low emissivity

Beautiful Range of Vivid Colours

Superior shades that create the design you envision
Optimum external reflection

- Internal reflection less than clear glass

Colour Rendering Index

Light falling inside through glass is natural that shows everything inside in its true colour

- Clear and natural inside-out view because of coating on a clear substrate

Flexibility in Processing

Used as annealed*
Heat treated, laminated on surface #1 & #2
Ceramic fritted, convex bent
Achieves better vision-to-spandrel combination

- Dual advantage – can be used as monolithic and a DGU
- Seamless aesthetics across all thicknesses

Sustainability

Meets India's green building requirements

- Helps improve energy efficiency of buildings

Range

Shorter lead time
Manufactured in India
Thickness range – 4mm to 12mm
Sizes - Up to 3660mm x 2550mm

- Wide range of selection on aesthetics and performance

* Except Solar Plus Blue 27, Green 27, Grey 27 and Neutral 27

PERFORMANCE SPECIFICATIONS OF GUARDIAN® SUNGUARD® SOLAR PLUS

Product Name	Visible Light			Colour Rendering Index Ra(D65)	American Standards (NFRC 2010)				Light to Solar Gain
	Transmission %	Reflection Outside %	Reflection Inside %		Summer				
					U-Value Daytime W/(m2K)	Shading Coefficient	SHGC	Relative Heat Gain W/ (m2)

Shades — Notes: — Guardian® reserves the right to change product performance characteristics without notice or obligation. — The performance values shown are nominal and subject to variations due to manufacturing tolerances. — Calculations & terms used in this performance numbers are based on NFRC 2010. The performance value shown above represent NOMINAL VALUES for the center of glass with no spacer system or framing. — May require heat strengthening or tempering to resist potential thermal stresses. Please contact Guardian® for assistance. — A slight shift in visible light reflectance or transmission may be noticed are heat treatment. — The Guardian® SunGuard® Solar Plus products i.e. Blue 27, Green 27, Grey 27 and Neutral 27 need to be heat treated before using in Single Glazed Unit or in Double Glazed Unit. Annealed and Heat treated not to be mixed on same façade, we recommend mockup to be done for aesthetic acceptance.
