Enhanced
Guardian
UltraMirror.™

 **GUARDIAN®
GLASS**
See what's possible™

Design flexibility.

Whatever your design ideas, Guardian UltraMirror™ can match them. From bathrooms to bedrooms, feature walls to furniture, and gymnasiums to

restaurants, UltraMirror can be adapted to size easily at your local dealership and each pane can measure up to 3.6 metres by 2.55 metres.

Guardian UltraMirror™ has outperformed standard mirrors in many accelerated tests – including humidity, salt fog, ferric chloride, ammonia and copper accelerated salt spray (CAAS) tests. This is why we offer a 10-year limited warranty.

A mirror with more.

Even reflection

Quality glass

Corrosion resistant

10-year warranty

Not all mirrors are the same. Produced by one of the most respected glass companies in the world, enhanced Guardian UltraMirror offers outstanding purity, precision, brilliance, durability and corrosion resistance.

Guardian Glass creates amazing mirrored environments, from the world's largest mirrored building, the Maraya Concert Hall, to beautiful home interiors with Guardian UltraMirror.

What makes enhanced Guardian UltraMirror™ so special?

Purity

Pure, smooth glass and silver surfaces that are free from imperfections create truer reflections. The new production process for Guardian UltraMirror helps ensure the accurate application, curing and final testing of both the silver reflective surface and the glass. Such stringent processes also help maintain a uniform silver layer – for truer reflections from any angle.

Precision

The thick glass surface of Guardian UltraMirror produces a flat surface that helps minimize warping and distortion to produce a true and even reflection. The larger the mirror, the more this can be a problem, but as Guardian UltraMirror has been supplied in so many large formats you can be confident it can perform well in almost any setting.

Brilliance

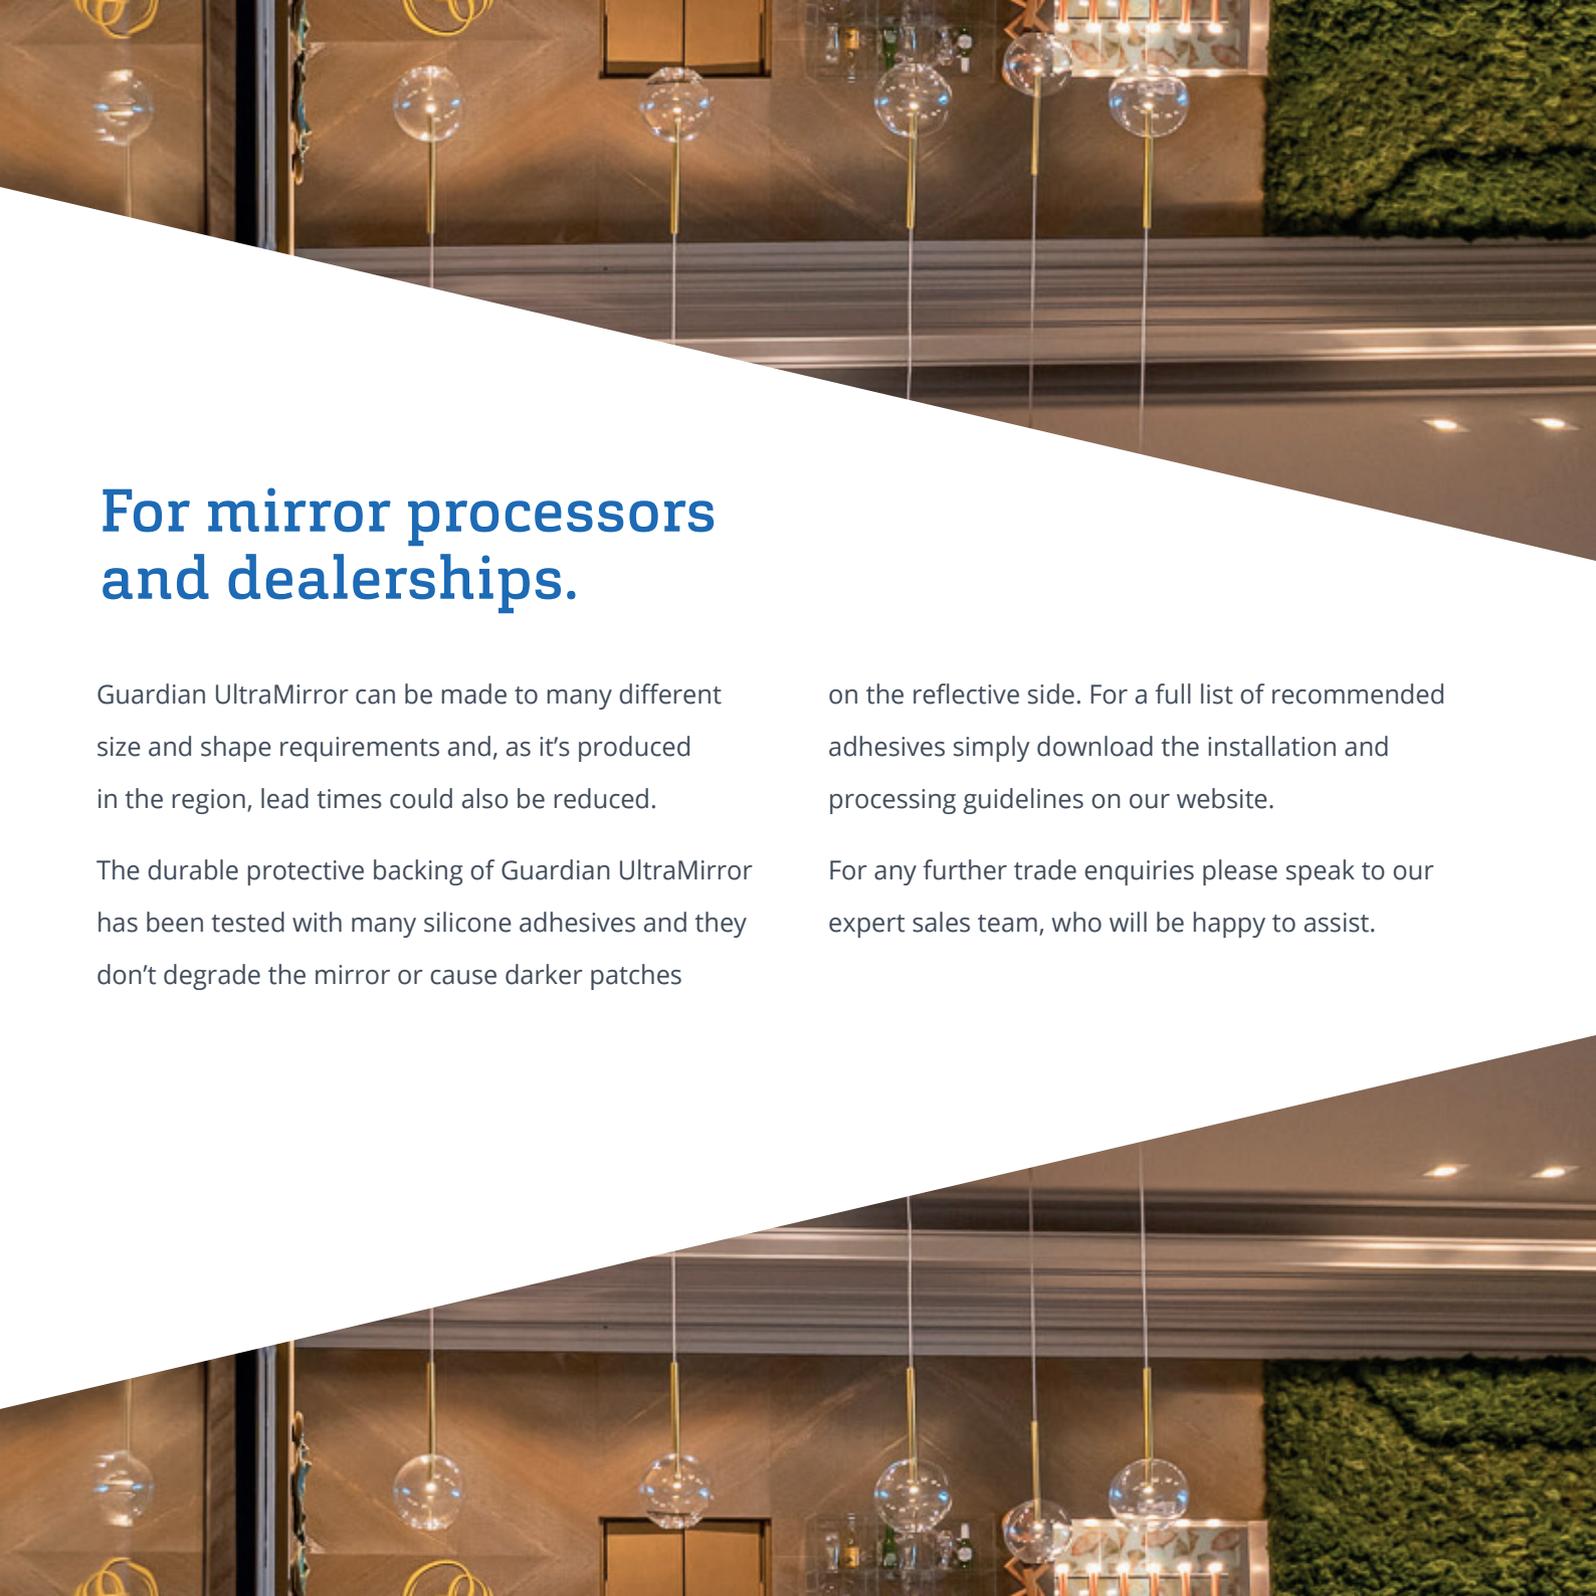

The uniform silver reflective surface and high quality base glass of Guardian UltraMirror mean the reflection is relayed back evenly. This creates a bright, crisp, consistent image which can improve light conditions so that a space feels lighter and larger.

Durability

Guardian UltraMirror is highly durable and corrosion resistant – tested in the harsh and dry conditions of the desert and in the high humidity of a bathroom. The silver coating has a double protection layer that helps prevent corrosion, bubbling and color distortion, which is why we also offer a 10-year warranty.

Environmental stewardship

We communicate transparently about Guardian UltraMirror's environmental performance – the product is covered by an Environmental Product Declaration (EPD).

For mirror processors and dealerships.

Guardian UltraMirror can be made to many different size and shape requirements and, as it's produced in the region, lead times could also be reduced.

The durable protective backing of Guardian UltraMirror has been tested with many silicone adhesives and they don't degrade the mirror or cause darker patches

on the reflective side. For a full list of recommended adhesives simply download the installation and processing guidelines on our website.

For any further trade enquiries please speak to our expert sales team, who will be happy to assist.
